

Putting on Your Futon Cover

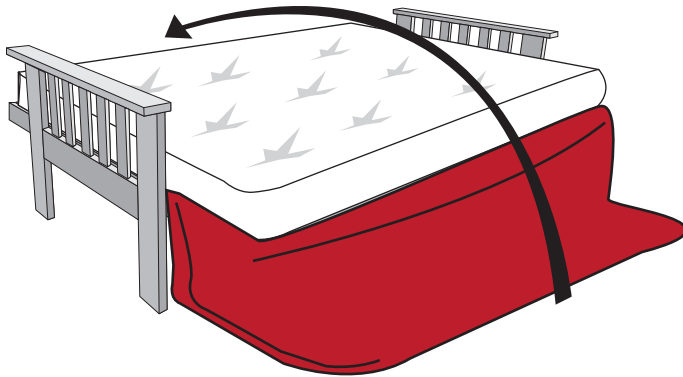

Fold your futon frame down into the bed position. Next, lean your futon mattress against the wall.

Unzip your new futon cover on all three sides. It has two wings and a center, like a butterfly.

Place one wing face-down over the slatted deck of your futon frame.

Lower your futon mattress on top of the cover.

Lift the remaining half of the cover on top of your futon mattress.

Zipper Tip: Never force or yank the zipper head! Align the cover first. Pull the two zippered sides together with your hands, and gently advance the zipper head. Coax the zipper head around all three sides.

Now convert your futon frame back into its sofa position, sit down and take a well-earned rest!

[Note: Cleaning your cover is easy. Follow its cleaning tag: dry clean or cold-water wash /cold-line-dry your cover, and zip it back on.]
